PROJECTS PLANNED 2024

Vocational skills

a way out of the poverty trap

From a pragmatic perspective, providing vocational skills, which are universally required, are relatively quick (and cost-effective) to acquire, low cost (i.e. require relatively low capital investment to get started) and do not require academic knowledge.

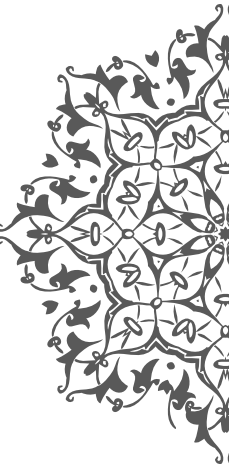

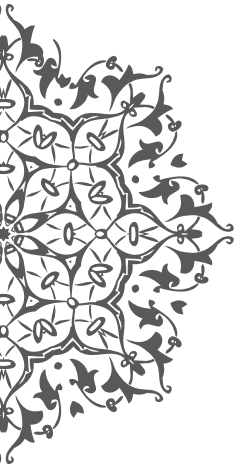

They provide an on-going (potential) income stream for everyone.

Beauty Course

One area which is both valid and growing in India is beauty. With a growing (particularly female) middle class, with both the time and the money to spend “on themselves” learning and being able to supply beauty treatments is a stepping stone to work, and entrepreneurial opportunity.

We are not teaching girls how to “be more beautiful” we are helping them to start their journey to becoming professional beauticians and thus generate an (additional) income.

Beauty Course

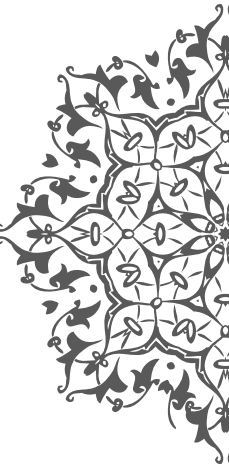

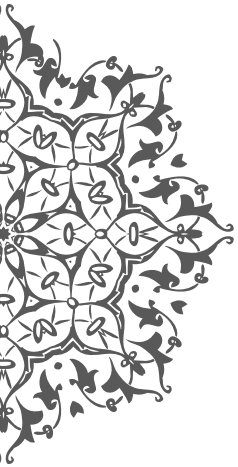

Funding needed: €7000,00

Creation of a classroom

1 year supply of materials

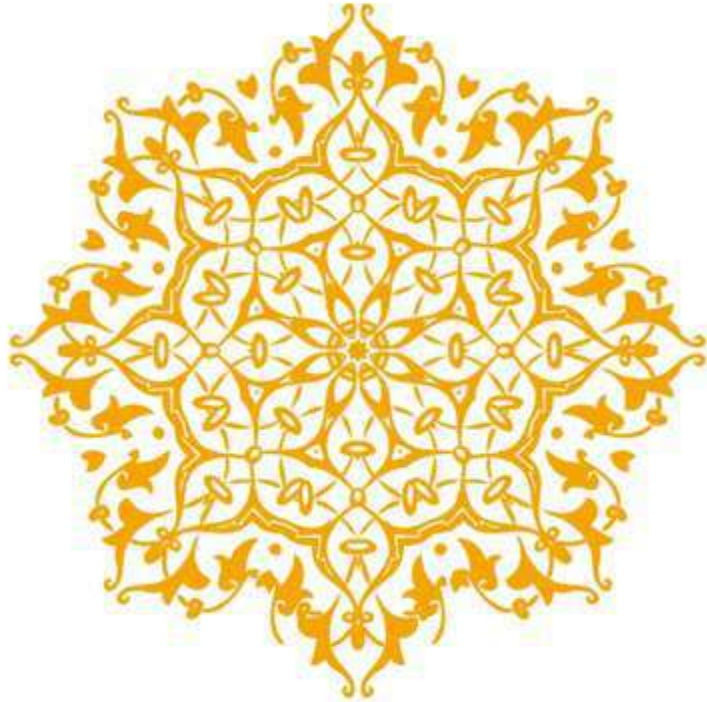

1 year of teachers salaries

At the end of the course the student will receive an official certificate

**WE ARE NOT CHANGING THE WORLD,
WE ARE RAISING THOSE WHO WILL**
